Interesting Facts

- The Svalbard Global Seed Vault stores various seed samples of agricultural crops to safeguard against accidental or catastrophic loss. The vault is located 400ft inside a sandstone mountain on the Norwegian island of Spitsbergen. Pic via Global Crop Diversity Trust
- Wall Street, home of the NYSE, originally ran by a 12ft tall stockade wall in 1685.
- Finely crushed marble powder is used in paint, toothpaste and plastics.

FEATURED Products

Solar Efficient

It is critical that we reduce our electrical consumption and make every effort to employ alternative energy sources whenever possible. With the Solar Pulse Project Fulton did both.

Using a single solar panel configuration, the sun provides all the electricity required for pulse combustion. With the Pulse boilers's unique operation there is no need for a traditional power burner. Drawing less than **one Amp** during run mode, Fulton's Pulse products are perfect for any solar application. Low Emissions models also provide the added benefit of NOx levels below 30ppm at all firing rates.

Fulton Pulse boilers contribute toward more **LEED Points** than any other industrial boiler on the market.

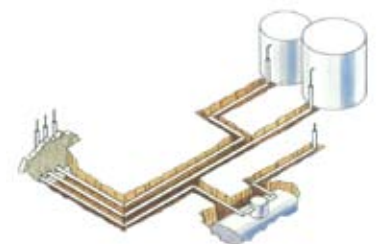

- Green Power
- Innovation In Design
- Optimizing Energy Performance
- On-Site Renewable Energy

For more information please visit our [Go Green with Pulse](#) web page.

Rovanco Piping Systems

A Rovanco pre-engineered piping system is built around a pipe that has a need to be insulated or contained. That pipe can be any one of many materials, including PVC, steel, copper or stainless steel. The basic insulating material is urethane foam. When required mineral wool, calcium silicate, fiberglass and foamglass are used to handle critical high temp applications. A wide range of protective jacketing materials are available including PVC, polyethylene, steel and aluminum.

Lochinvar Training in Fargo

Last month we brought in a Lochinvar Factory Service Tech to provide training on the Knight and PowerFin boilers in Fargo. Various contractors from around the area attended including: Manning, Robert Gibb, Peterson, HA Thompson, Lunseth & Mowbray & Sons.

Topics of discussion included installation, operation, controls, maintenance and troubleshooting. These contractors are now factory trained to provide installations, startups, service and preventative maintenance on Lochinvar Knight and Powerfin boilers and water heaters.

In combination with this Lochinvar training and the Fulton training last year, most of the North Dakota contractors are now factory trained on all of our products. We will continue to provide new factory training in the future.

SMART SYSTEM™

Both the Knight and Power-fin boilers are equipped with the built-in SmartSystem controller.

- 2-Line 16-Character Display
- Freeze Protection
- Outdoor Reset
- 0-10VDC BMS Input
- Cascading Lead Lag Sequencer (for up to 8 units)

Oldest Boiler Contest

Who can find the oldest operating boiler in our territory(MN,SD,ND)?

\$100 Gift Card Prize

Please provide the following information by July 15th 2008:

- Picture of Boiler
- Picture of Name Plate with Date
- Boiler Manufacturer
- Boiler Model Number
- Job Name
- Job Location
